

K7SFN APRS Hardware:

**Home: APRS Terminal: LCD Viewer: Foxview2 with
Tracker add-on Module: **FD-OT+ (Firmware Build 54908)****

Mobile: **FD-OT+ Tracker (Firmware Build 54908)**

Here are my Settings:

**Callsign: K7SFN-9
Path: WIDE1-1, WIDE2-1
Reporting Options: Course & Speed Checked
Symbol Table: / Symbol Code: k (Pickup Truck)
Quiet Time: 14 = (14/56 Sec = 250ms)**

Smart Beacons Setup:

**At Speeds between 5 and 60 MPH
Use Transmit Rate from 1800 to 60 Seconds
Transmit when turning more than 27 Degrees
But Not more than Once every 10 Seconds**

**Position: GPS (GPS Fix required before transmit)
Waypoint Output: Enabled (6 Characters)
Counter: Not Enabled
Power Control: Not Enabled
Software DCD: Enabled**

**The above setup, displays other APRS stations on my Garmin GPS 60cx as
Waypoints, so I can see nearby stations.**

**73s,
Frank – K7SFN**
